

TABLETOP EXERCISE

Train the way you fight and prepare for the most sophisticated adversaries

BUILD CONFIDENCE IN YOUR INCIDENT RESPONSE PLANS

Adopting a proactive approach to cybersecurity is essential in today's global threat landscape. You may have an incident response (IR) plan in place for a cyberattack, but how confident are you that your plan will be effective when it comes to responding to a real incident and stopping a breach from impacting your business?

Running simulation exercises enables you to take a proactive approach and test your IR plans across your organization to determine your cybersecurity readiness.

REVIEW YOUR TEAM'S ABILITY TO RESPOND

A CrowdStrike® Tabletop Exercise will present an incident scenario that has been tailored to your unique environment and operational needs. CrowdStrike Services will facilitate a discussion among your response team about what actions are required, who is responsible for them, who needs to be notified and how to coordinate multiple moving parts. At the end, you will receive a report highlighting strengths and opportunities to improve. The CrowdStrike Services team takes pride in realism, drawing inspiration for each scenario from years of experience as incident responders and from what the CrowdStrike Intelligence team has observed.

KEY BENEFITS

Gain response experience:
Practice responding to realistic incidents without having to suffer the real-world consequences

Identify capability gaps:
A tabletop simulation is an effective step to understanding what is working and what is not

Increase response familiarity:
Become familiar with your response plans and identify where they can be improved

Train the way you fight:
Experience real-life scenarios taken from CrowdStrike's threat intelligence and incident response practices

TABLETOP EXERCISE

This in-depth experience responding to targeted threats provides a real-world perspective that is infused into the exercises. Whether running a simulation for your security operations center (SOC) or for your business leaders, CrowdStrike remains focused on ensuring that the scenario, available information and decision points mirror realistic challenges that your organization may face. This commitment allows your participants to fully engage in the scenario, coming together in the face of adversity to overcome the kinds of obstacles that modern threat actors are likely to place in your way. Through this process, CrowdStrike Services helps you identify what works well and where your team needs to improve.

KEY SERVICE FEATURES

- **Unique scenarios:** CrowdStrike develops tabletop exercise scenarios from scratch, designing each one to focus on your objectives.
- **Expert facilitators:** CrowdStrike facilitators help keep your team engaged and bring the scenarios to life. They challenge your participants to work together, share their experiences of how similar organizations have tackled similar challenges, and keep conversations on track.
- **The ultimate learning experience:** The best way to learn is by doing, and CrowdStrike simulations offer the opportunity to do exactly that in a safe environment.
- **Threat briefing:** If desired, the CrowdStrike Services team can provide a brief threat briefing — tailored to your organization — to set the stage for the exercise and ground the scenario in reality.

ABOUT CROWDSTRIKE SERVICES

CrowdStrike Services delivers Incident Response, Technical Assessments, Training, and Advisory Services that help you prepare to defend against advanced threats, respond to widespread attacks, and enhance your cybersecurity practices and controls.

We help our customers assess and enhance their cybersecurity posture, test their defenses against real-world attacks, respond to incidents, accelerate forensic investigations, and recover from a breach with speed and precision. Harnessing the power of our Security Cloud and the CrowdStrike Falcon® platform, we help you protect critical areas of enterprise risk and hunt for threats using adversary focused cyber threat intelligence to identify, track and prevent attacks from impacting your business and brand.

CrowdStrike: **We stop breaches.**

WHY CHOOSE CROWDSTRIKE?

CrowdStrike Services guides you through a real-world incident scenario as a discussion-based tabletop exercise.

Expertise and experience:

When conducting exercises, realism matters. The CrowdStrike Services team's deep experience brings a real-world perspective, helping to maximize the value of the exercise to your participants.

Tailored to the audience:

Each exercise reflects who is participating and what they need to learn. An exercise for technical responders will focus on investigative techniques, scoping and escalation, whereas an exercise for managers will cover reputation management, legal issues and the challenges of decision-making with incomplete information.
